

Dry Unit

MODEL : RS-1200

Portable medical aspirator

Feature

- Compact and light weight and portable. Suitable for using at patient's house.
- Piston type oil-less vacuum pump is loaded. Much higher suction power, compared to the conventional diaphragm pump loaded unit.
- A thick hose can be used for the suction hose by removing the hose attachment of the bottle.
- As a safety device, a float stopper is installed inside the suction bottle to prevent the bottle from overflowing. In addition, a suction filter is installed between the suction bottle and the main body, the suction of filth, which is the number one cause of accident, is completely shut out.

Standard accessories

Specification of RS-1200

Product lineup	RS-1200	Outside dimensions (W x D x H mm)	170 x 250 x 195 (270) mm
Maxi suction pressure	-83 Kpa (-622 mmHg)	Weight	5.0 Kg
Suction flow	27 litter min	Case material	SPCC (Baking powder coating)
Suction pressure adjustment	Dial	Safety function	Overcurrent protection fuse, Float stopper, Suction filter
Operation mode	Continuous operation		
Suction Bottle	1000mL x1	Standard accessories	Suction hose (2.0 m), Suction filter Operation manual, Warranty card
Bottle material	Polycarbonate		
Bottle cap material	ABS	Power supply	AC220V 50 Hz Single-phase
Built-in Vacuum pump type	Single piston type / 100W	Power consumption	Max 170 VA
Noise level	58 dB	Safety standard	IEC60601-1-2:2014

* Suction filter should be changed periodically to keep the suction pressure.

* Hose can be changed easily.

* The size includes the length of suction bottle.

⚠ Cautions for safety use:
